Professional Experience

Frontend Developer

2024/01 – present | Mumbai, India

- Developed responsive and resuable UI components using React JS, JavaScript, HTML and CSS for dynamic web app.
- Integrated RESTful APIs using Axios and fetch.
- Used React Hooks to manage state and lifecycle events in functional components.
- Worked with version control systems like Git and GitHub to manage codebase, branches and collaborative workflow.

Integration

2022/06 – 2023/09 | Pune, India

- Tibco Application Monitoring
- Gateway (Will Check the error using logs and server name)
- GlobalScape (runs the server on which client has raised a ticket)

Projects

Food Delivery App ⧉

- Developed a full-stack food delivery web application using MongoDB, Express.js, and React.js to enable users to browse menus, place orders, and track deliveries in real time.
- Implemented user authentication with JWT and role-based access control for customers, delivery personnel, and admins.

Food Delivery (Admin) ⧉

- Built using React JS, MongoDB ensuring secure login and data management.
- Implemented features for real-tile order tracking, menu management and user control.

YouTube Clone (Desktop View) ⧉

- Built a YouTube clone using React.js and integrated with the YouTube Data API v3 to fetch and display real-time video content.
- Implemented search functionality to allow users to query and browse videos dynamically based on keywords.

EMI Calculator ⧉

- Utilized React state and hooks for real-time calculations and input handling.
- Applied financial formulas to compute EMI, total interest ad total years.
- Added responsiveness using CSS flexbox and media queries for seamless use on all devices.
